

NewBuild 30

THE ANSWER TO THE FASTEST GROWING PROBLEM IN THE NEW CONSTRUCTION INDUSTRY!

Here is what *Arizona State University's* testing lab had to say about *NewBuild 30*

"Pinewood and drywall were treated with NewBuild 30 and then inoculated with 10 million spores of Penicillium and other mold and mildew spores. After the incubation period at 37°C the drywall had less than 0.1% of surface area growth and the pinewood showed no visible growth on the treated surfaces."

"Pinewood and drywall were treated with NewBuild 30, then inoculated with bacteria. After 24 hours of incubation no organisms were recovered from treated pinewood or drywall surfaces. The treated samples remained negative for all organisms throughout the course of this study."

Characteristics & Benefits

- Cleans & Prevents Mold, Mildew, Algae and Bacteria Growth on Surfaces**
- Penetrates Rather than Coats - Prevention Comes from the Inside Out**
- Bonds to Fiber - Won't Wash Off**
- One Step Process**
- Available in Clear or Other Translucent Colors**
- Less Labor - Less Time**
- Resists Water & Can be Painted Over**
- Extremely Cost Effective**
- Written 30-Year Warranty**

NewBuild 30 penetrates the surfaces of porous building materials and at the same time provides an ongoing protective barrier to inhibit future growth of mold, mildew, bacteria and algae."

30-Year Warranty

NewBuild 30

THE PROACTIVE AND PREVENTATIVE ANSWER FOR THE STRONGER STRAINS OF MOLD, MILDEW, BACTERIA AND ALGAE IN THE NEW BUILDING INDUSTRY.

30-YEAR WARRANTY

Protects New Construction Materials from Mold, Mildew, Bacteria and Algae Growth on the Treated Surfaces.

Information & Procedure

Application	Airless Sprayer
Surfaces	Unfinished wood, brick, block, drywall, concrete
Coverage	1000-sq. ft. per gallon
Dry to Touch	1-2 hours
Clean-up	Soap and Water
Color	Clear or other translucent colors
Warranty*	30 Years

*when applied by trained applicator
